PRODUCT STRUCTURE

Laminate Flooring

Wear layer

- protects the floor and prevents fading
- helps the floor withstand daily use
- creates an easy to clean and stain resistant surface

Decorative Layer

- gives the floor a wood like appearance and characteristic
- strenghtens the floor

Substrate Layer

- the inner core offers additional protection
- made from ultra-durable high density fibre board for strength and stability

Backing Layer

- strengthens the board
- water resistant
- provides stability to the laminate
- decreases the chances of the laminate deforming or bowing
